ARYAN SUTARIYA

Computer Engineer
Gmail | LinkedIn | Github | Surat, Gujarat

Summary

I am computer engineer student seeking an internship opportunity to gain practical experience, enhance technical skills, and apply theoretical knowledge in real-world projects while contributing to the organization's growth. Highly interested in Data Analysis, machine learning, web development and artificial intelligence. Eger to learn upcoming and modern technologies.

Education

Ashadeep IIT — 2021 - 2022
Higher secondary certificate | Percentage: **87.3** / 100

Sarvajanik College of Engineering & Technology — 2022 - 2026
B.Tech in computer engineering | CPI: **8.97** / 10

Projects

AayuBot - A Smart Healthcare Assistant

Live

Developed an intelligent health assistant chatbot designed to provide personalized medical suggestions and real-time healthcare support. The platform ensures ease of access to basic healthcare guidance, especially for underserved communities. Built as part of an Open-Ended Problem (OEP) initiative under academic mentorship of Prof. (Dr.) Dipali Kasat.

Movie-app

Live

This website is a React-based movie application. It utilizes the Vite build tool for fast performance and tailwind CSS for custom styling. Functioning as a client- side gateway, the system asynchronously consumes external RESTful APIs (such as TMDB) to retrieve, parse, and render dynamic movie metadata and media assets in real-time.

Mono Theme Clone (E-Commerce) | React, Vite, Netlify

Live

Developed a high-fidelity clone of a premium Shopify e-commerce theme using React and Vite. Engineered reusable UI components (Product Cards, Navigation, Modals) ensuring code modularity and maintainability. Phpmyadmin has been used to deal with login and cart data through xmapp control panel. Achieved a fully responsive layout matching the original design specifications across all device sizes.

Achievements

SAP Code Unnati Certification

Completed comprehensive training in Python, Data Analysis, and Artificial Intelligence, including SAP Conversational AI Chatbot development (conducted by Edunet Foundation & SAP).

University Level Idea Pitching (2024)

Selected to present innovative startup concepts at the SSIP Cell Idea Pitching event at Sarvajanik University.

Certificate of Merit, R&D Cell (2024-2025)

Awarded for the successful development of "AayuBot: The Smart Healthcare Assistant," a research project under the Open Ended Problem initiative at SCET.

Top 50 Finalist, Limitless Hackathon

Recognized among the top 50 teams in a national-level hackathon organized by Mercer | Mettl.

Skill Stack

Programming Languages: C, Java, Python

Web Technologies: HTML, CSS, JavaScript, React.js
