ARYAN SUTARIYA

Web Developer | Computer Engineering Student | Profile
aryansutariya005@gmail.com | linkedin.com/in/aryan-sutariya | github.com/Aryan-Sutariya | Surat, Gujarat, India

PROFESSIONAL SUMMARY

Detail-oriented Computer Engineering student skilled in developing performant, native-feeling mobile applications using React Native and JavaScript. Experienced in engineering modular architecture, consuming RESTful APIs, and deploying mobile solutions. Seeking an internship or entry-level React Native Developer role to contribute to high-impact mobile projects.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C.
Front-End: React.js, HTML5, CSS3, Tailwind CSS, Vite.
Back-End & Database: PHP, MySQL, phpMyAdmin, XAMPP.
APIs & Integrations: RESTful APIs, TMDB API.
Developer Tools: Git, GitHub, VS Code, Netlify, Vercel.
Core Concepts: Responsive Design, Component-Based Architecture, Agile Workflow.

EDUCATION

B.Tech — Computer Engineering *2022 – 2026*
Sarvajanik College of Engineering & Technology (SCET), Surat, Gujarat ***CPI: 8.97 / 10***

Consistently maintained high academic performance while delivering industry-standard web development projects. Participated in Open-Ended Problem (OEP) initiatives, SSIP Cell events, and national-level hackathons.

Higher Secondary Certificate (HSC) — Science Stream *2021 – 2022*
Ashadeep IIT, Gujarat ***Percentage: 87.3%***

EXPERIANCE

DATA SCIENCE (AI/ML) Intern | Dominant InfoTech
12 Jan – 12 Apr 2026

Engineered end-to-end interactive web applications and AI dashboards, utilizing asynchronous API integrations (Groq, Whisper) and complex JSON structures to translate backend machine learning analytics into seamless, real-time user interfaces.

PROJECTS

Niramay Ayurvedic Clinik — Full Stack Web Application **Live Demo**
Tech Stack: React.js, Node.js, PostgreSQL, Vercel, Render

Engineered a production-ready full-stack appointment booking system for an Ayurvedic clinic using React.js, Node.js, and PostgreSQL, featuring real-time slot availability, WhatsApp-based booking confirmation, GSAP scroll-triggered animations, a patient feedback system, and a comprehensive admin dashboard with earnings analytics (Recharts), slot management, payment tracking (deposit/full), and automated cancellation & refund workflows.

Movie App — Real-Time Movie Discovery Platform [Live Demo]

Tech Stack: React.js, Vite, Tailwind CSS, TMDB RESTful API, Netlify

Developed a movie discovery platform using React.js and Vite that asynchronously fetches and renders live metadata via the TMDB RESTful API, incorporating optimized client-side routing, efficient state management for minimal re-renders, and a pixel-perfect UI built with Tailwind CSS for seamless cross-device experience.

Mono Theme Clone — Full-Stack E-Commerce Platform [Live Demo]

Tech Stack: React.js, Vite, PHP, MySQL, phpMyAdmin, XAMPP, Netlify

Built a high-fidelity, fully responsive Shopify e-commerce theme clone using React.js and Vite with modular, reusable UI components (Product Cards, Navbar, Modals), integrated a PHP/MySQL back-end via XAMPP and phpMyAdmin for secure user authentication and persistent shopping cart management.

Wine Quality Prediction & AI Sommelier [Live Demo]

Tech Stack: Python, XGBoost, SHAP, Streamlit, ChromaDB, Groq LLaMA 3.3, Whisper API, gTTS, PyMuPDF

Built a production-deployed ML web application predicting wine quality using a tuned XGBoost pipeline with SHAP explainability and LLM-generated explanations; designed a novel Agentic Vectorless RAG chatbot (ReAct agent + hierarchical PDF indexing) for hallucination-free, page-cited wine science Q&A; integrated ChromaDB semantic search, chemical similarity recommender, and Isolation Forest anomaly detection into a single Streamlit application.

Mental Health Prediction in Tech Survey [Live Demo]

Tech Stack: Python, Streamlit, Scikit-Learn, Random Forest, Pandas, NumPy, Matplotlib, Seaborn, Joblib

Built a full-stack ML-powered Streamlit application that preprocesses raw survey data (age filtering, gender normalization, label encoding, mode imputation), trains and deploys a hyperparameter-tuned Random Forest Classifier to predict treatment-seeking behavior with probability-based confidence output, and renders an interactive analytics dashboard with demographic breakdowns, correlation heatmaps, and feature importance rankings across 1,200+ respondents.

CERTIFICATIONS

SAP Code Unnati Certification *Edunet Foundation & SAP*

Completed advanced training in Python, Data Analysis, Artificial Intelligence, and SAP Conversational AI Chatbot development.

ACHIEVEMENTS & ACTIVITIES

Certificate of Merit, R&D Cell — SCET (2024–2025)

Awarded for outstanding development of AayuBot: The Smart Healthcare Assistant under the Open-Ended Problem initiative.

Top 50 Finalist — Limitless Hackathon, Mercer | Mettl (National Level)

Ranked in the Top 50 teams nationally, demonstrating rapid prototyping, teamwork, and problem-solving under pressure.

University-Level Idea Pitching — SSIP Cell, Sarvajanik University (2024)

Selected to pitch innovative startup concepts, showcasing entrepreneurial thinking and clear technical communication.
